

Trauma Training

Trauma can affect many aspects of a child's life. Oftentimes we fail to understand the effects of trauma, possibly not understanding a child's behavior as a result of the trauma. It can be easy to see a child's behavior as defiant, or disruptive, when the behavior is really a result of the child's response to trauma. This workshop, with curriculum from *Akron's Children Hospital*, can help educators, and others who deal with children, understand the impact trauma can have on a child's life.

What you will learn:

- The **impact of trauma** on a child's brain
- How to **manage trauma** in the classroom
- Strengthening resiliency through **developmental assets**
- Recognizing & handling **secondary traumatic stress**

This is a Level 1 training for participants who have had little or no training on trauma.

Please call Pat Clark at 513.695.2900 ext. 1653, or email at PatriciaClark@warrencountyesc.com if you would be interested in bringing this training to your school or agency.

COST: FREE, through **Project AWARE (Advancing Wellness and Resilience in Education)**
